

CONTENTS

1. STRUCTURE OF THE PRODUCTION PROCESS.....	3
2. ACCURACY OF MACHINING.....	8
2. 1. Types of Errors.....	9
2. 2. Statistical Analysis of Product. Quality Characteristics.....	10
2. 3. Point-to-point Graphs and Accuracy Charts.....	18
2. 4. Calculating Method for Error Evaluation.....	20
2. 4. 1. Machine tool Geometry Errors.....	21
2. 4. 2. The Wear of Cutting Tool.....	23
2. 4. 3. Rigidity of a Manufacturing System.....	25
2. 4. 4. Thermal Deformation of the Manufacturing System...	31
2. 4. 5. Determining the Total Error of Machining on a Preset Machine Tool.....	34
3. DIMENSIONAL PRESET OF A MACHINE TOOL.....	39
3. 1. Preset by a Trial Pass.....	40
3. 2. Preset by Trial Parts.....	41
3. 3. Static Set-up.....	43
4.0. LOCATING AND LOCATING ELEMENTS (LE), (BASES) IN MACHINE-BUILDING. TERMS AND DEFINITIONS. (GOST 21495 - 76*).....	46
5. MANUFACTURING PROCESS PLANNING.....	57
5. 1. The General Process Planning Approach and Sequence.....	57
5. 1. 1. The Study of the Part Drawing and Specifications.....	58
5. 1. 2. The Type of Production.....	61

5. 1. 3. Selection of Blank-making Process.....	62
5. 1. 4. Selection of Manufacturing Locating Elements.....	63
5. 1. 5. Development of the Process Route for Separate Workpiece Surfaces.....	71
5. 1. 6. Development of the Part Process Route.....	75
5. 1. 7. Planning of the Manufacturing Operations.....	76
5. 1. 8. Manufacturing Process Documentation.....	79
6. UNIFICATION OF TECHNOLOGY.....	81
6. 1. Type Technology.....	82
6. 2. Group Technology.....	84
6. 3. Module Technology.....	86
6. 4. Benefits of Unification.....	87
7. MANUFACTURING OF TYPICAL PARTS.....	93
7. 1. Shafts.....	93
7. 2. Bushings.....	99
7. 3. Gears.....	102
